## Patent Statistics

The following list summarizes the six sections on the site, the information that can be queried, and the results of each query:

### Patent Statistics section

**available search options** - by field center, month, and year.

**search results format** - (table format) The resulting data is divided into field center, month, and total fiscal year data (columns) as it relates to each reporting entity type (rows). A legend is provided at the top and bottom of the query results table for reference.

### Patent Applications Filed section

**available search options** - by field center, month, and year. An additional display option, which is toggled by a check box included with the above options, allows a detailed listing of query results. This extended display format includes the title, case number, NASA center, Issue Date, Patent Number, Attorney of Record, inventors, technology abstract, and commercial potential.

**search results format** - (record listing format) The title, case number, and originating field center is listed for each returned technology record. When the Technology title is clicked, a detailed Patent Profile page is displayed.

## Patent Statistics Website - Tip #32

---

### Patents Issued section

**available search options** - by field center, month, and year. An additional display option, which is toggled by a check box included with the above options, allows a detailed listing of query results. This extended display format includes the title, case number, NASA center, Issue Date, Patent Number, Attorney of Record, inventors, technology abstract, and commercial potential.

**search results format** - (record listing format) The title, case number, and originating field center is listed for each returned technology record. When the Technology title is clicked, a detailed Patent Profile page is displayed.

### Patent Statistics for Cases Filed by Others section

**available search options** - by field center, month, and year.

**search results format** - (table format) The resulting data is divided into field center, month, and total fiscal year data (columns) as it relates to each reporting entity type (rows).

### Patent Statistics for Licenses Executed section

**available search options** - by field center, month, and year.

**search results format** - (table format) The resulting data is divided into month and total fiscal year data (columns) as it relates to domestic and foreign exclusivity (rows). A legend is provided at the top and bottom of the query results table for reference.

### Patent Statistics for Royalties section

**available search options** - by month and year.

**search results format** - (table format) The resulting data is divided into field center, License Number, royalty amount by month, and royalty amount for the fiscal year (columns).
